

Learn How Cloudride helped Easycoach seamlessly deploy agile cloud migration

With Cloudride we benefit from consistently top professional service & support. Cloudride's DevOps team understand our needs and is always available to provide a prompt and effective response to any arising requirement.

Shlomi Meiner
Founder & CEO, Easycoach

INTRO

The customer developed an intriguing website and app that helps coaches, clubs, players, or FA around the world access a professional and modern ever-growing football ecosystem where they can form, track, run and scale the vision of the team workflow in one platform.

THE CHALLENGE

The challenge was to take an idea in code form and work with the development team to transform it into a cloud working environment, creating a CI/CD flow on top of Gitlab and letting the developers be able to push their changes and see it live in the environment.

THE GOAL

Our Goal was to deliver a CI/CD environment that enabled the development team to work and deploy without a constant need for DevOps to be in the way while connecting the environment on servers for the first time.

Flexibility

Scalability

Learn How Cloudride helped Easycoach seamlessly deploy agile cloud migration

THE RESULT

A working environment that enables the customer to initiate its workflow. The system is working flawlessly with a frontend/backend solution. The next stage is to add a multi Region solution and ASG to the environment - to enable support of multiple capacity loads.

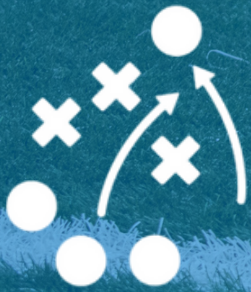

"It's been a blast working with EasyCoach. As a certified Amazon partner, and with the importance of facilitating an optimal user experience, we worked closely with Amazon from the very beginning, in close collaboration, supporting planning, deployment, and ongoing optimization".

Danny Lev Ran
CEO, Cloudride
